

Do you need a laboratory science?

Do you like to watch *"CSI"*?

Consider taking this non-science majors course

Chem 107: Intro to Forensic Chemistry

- Learn the basics of chemistry as it relates to the evaluation of scientific evidence in a crime lab.
- Study fingerprinting and learn how to develop latent prints at a crime scene.
- Use a Gas Chromatograph to test evidence samples.
- Perform microscopic analysis of hair and fiber samples.
- Study and perform DNA profiling analysis.
- Experience the real world of Forensics through guest speakers.

Fall 2009 Lecture: MWF 10-10:50, Lab: Fri 11-2:00
